

• And what does it mean for you? Stare at the cobalt blue sky. Read the last chapter of your “who done it” novel. And, your kids splashing in a pool is about as American as Huck Finn’s backyard swimming hole. This summer the fun’s on POOL FROG®.

MINERAL POOL CARE!
FOR IN GROUND POOLS.

- LESS WORK WITH EASY PRE-FILLED PACS.
- UP TO 50%* LESS CHLORINE.
- IMPROVES SWIMMING POOL PLEASURE.

*Compared to the minimum EPA recommended chlorine level of 1.0 ppm for a stabilized swimming pool.

Let me
put the
FUN
in your
pool!

**POOL FROG® DOES
ALL THE WORK!**

- POOL FROG® is one giant leap for pool care. Customers say POOL FROG® stands for more family fun because it automatically dispenses minerals and chlorine. They swim, while POOL FROG® keeps their pool water clean and fresh, while reducing fumes, red eyes, and itchy skin. Just set it and forget it for weeks at a time.

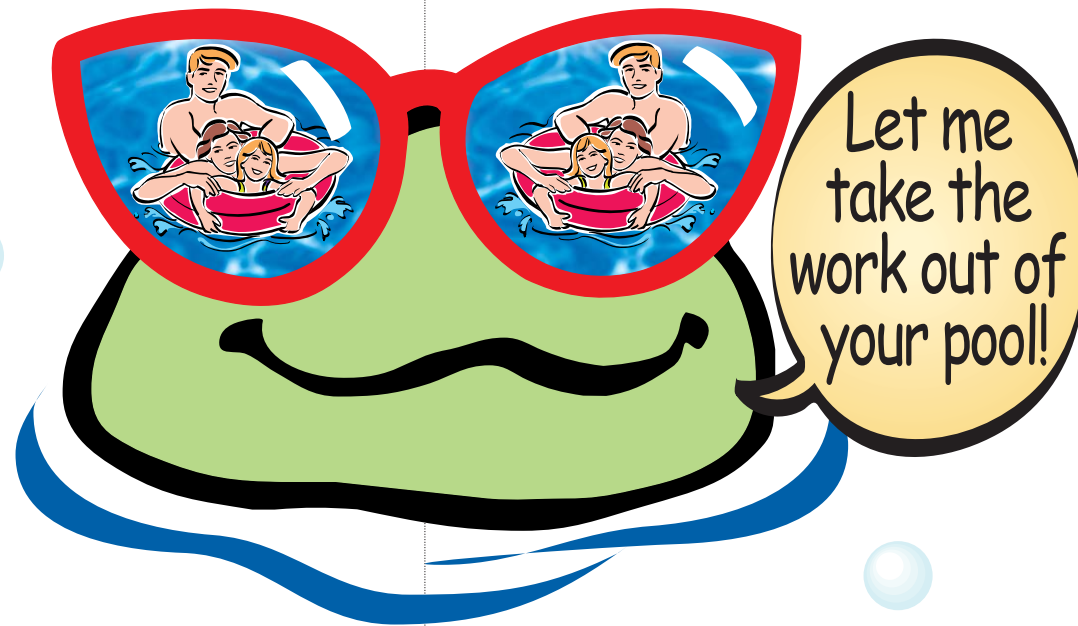

PUT POOL FROG® TO THE TEST!

• See if your pool doesn't use less chlorine with far less work while still maintaining crystal clear water. That's because POOL FROG® uses minerals that make the water feel softer and look sparkling clean. POOL FROG®'s patented minerals destroy bacteria with a controlled-release formula that lasts 6 months.

• They also help keep your pH balanced by acting as a neutralizer. On a blazing hot day, dip your head under water and take a look around. You can actually see what POOL FROG®'s been doing while you've been playing—crystal clear water.

• Put POOL FROG® to the test.

LET US DISSECT THIS FROG® FOR YOU.

POOL FROG®
IN GROUND CYCLOR

POOL FROG®
MINERAL RESERVOIR

• The POOL FROG® system is three parts in one. **First**, the POOL FROG® Cyclor serves as a "water treatment center" and controls the flow of water. **Second**, the POOL FROG® Mineral Reservoir, the essential part of the system, is placed inside the POOL FROG® Cyclor and holds one season's worth of minerals. **Third**, a POOL FROG® Bac Pac is placed inside the POOL FROG® Mineral Reservoir, providing low level chlorine support.

• POOL FROG® offers complete pool care in one unit. No extra plumbing. No extra headaches. And no electricity. Quite frankly, it's a riveting concept (ok it's a bad pun, but FROG® enjoyed it!)

POOL FROG® BAC PAC

CHLORINE SUPPORT MADE EASY.

• If having fun and spending as little maintenance time as possible is your first priority, set and forget the POOL FROG® Cyclor with a POOL FROG® Bac Pac inside the POOL FROG® Mineral Reservoir.

• POOL FROG® is the only mineral system with a pre-filled chlorine pac that meets the EPA requirements to lower previously approved safe chlorine levels by up to 50%*.

• This is a very convenient way of reducing chlorine use and hassle. Simply set the valve on the POOL FROG® Cyclor, and your family will experience an endless summer.

HOW LONG DO THE POOL FROG® MINERAL RESERVOIR AND POOL FROG® BAC PAC LAST?

• In addition to one POOL FROG® Mineral Reservoir per season (two for year-round pools), the POOL FROG® Bac Pacs containing chlorine will need to be replaced approximately every 1-2 weeks (actual times will vary depending on pool size, proper set up, number of swimmers, water and air temperature).

*Compared to the minimum EPA recommended chlorine level of 1.0 ppm for a stabilized swimming pool.
