

PRECAUTIONARY STATEMENT

Never mix this product with any other chemical. On pools with erosion type chlorinators, always close inlet valve to chlorinator or remove chlorinator canister from unit when using filter cleaning chemicals.

GENERAL INFORMATION

Proper filtration and chemical treatment are equally important in maintaining good swimming pool water clarity. Sand which collects suspended particulates in the filter can significantly reduce filtration efficiency, affect water quality and increase operating costs. **Sand Filter Cleaner** is effective in removing debris/particulates from the sand bed, the filter and its elements.

DIRECTIONS FOR D.E. AND CARTRIDGE FILTERS

Using a clean spray bottle with full strength product, evenly coat elements or cartridge. Wait 10 minutes; then using garden hose, thoroughly rinse for 5 minutes, or using a large clean plastic bucket, soak for 1 hour in one part of this product to three parts water.

DIRECTIONS FOR SAND FILTER

Backwash filter thoroughly. Turn pump off. Pour **Sand Filter Cleaner** into skimmer basket. Chlorine must be removed from the skimmer basket prior to addition of this product. Automatic feeder should be turned off prior to any addition of this product. See chart for exact amount of this product to be used. Turn pump on until pump primes and product moves into filter. Leave filter selector in backwash position or in closed position. Wait one hour. Turn pump on with selector in backwash position, until backwash waste water is clear. If filter has not been degreased within 12 months, use double the amount of this product, or 1 cup per 100 lb. of sand.

MAINTENANCE USAGE

Pour 8 ounces of **Sand Filter Cleaner** into skimmer while backwashing filter. Chlorine must be removed from the skimmer basket prior to addition of **Sand Filter Cleaner**. Automatic feeder should be turned off prior to any addition of this product. For maximum filter performance, it is recommended to be done at each backwashing.

Packaged in the USA

Sand Filter Cleaner 32 oz.
