

## PRECAUTIONARY STATEMENTS

**Nature's Magic** is a biodegradable, non-toxic, non-irritating, hypo allergenic, environmentally safe enzyme formulation specifically designed to digest and convert oils and some other organic compounds in pool water to oxygen, carbon dioxide and water. **Nature's Magic** in its concentrated form may cause skin or eye irritation if there is excessive, long-term exposure to concentrate. Gloves are recommended when handling this product in its concentrated form.

## GENERAL INFORMATION

This aqua colored, pleasingly fragrant, enzyme concentrate is specifically formulated to digest body oils, suntan oils and lotions found in pool water. These enzymes eliminate unsightly water-line rings, removes the haze in pool water caused by oils and helps eliminate odors from water contaminated with oils by biocatalytic decomposition of the oil to oxygen, carbon dioxide and water.

### MULTI-ENZYME CONCENTRATE

- Breaks Down Oils in Swimming Pool Water
  - Natural Enzyme Action
  - Safe to Swim After Treatment
- Environmentally Safe & Non-Toxic.

## DIRECTIONS FOR USE

**Nature's Magic** should initially be added to the circulating water through the skimmer at the rate of 1 to 2 ounces per thousand gallons of water in the pool. By the very nature of enzyme digestion the biochemical reaction is slow and patience is recommended by allowing the digestion of the oils to take place. It may take 1 to 3 days for there to be a noticeable change in the elimination of the oils from the water. Once a concentration of the enzyme is established and maintained in the water, there should be no accumulation of problem-causing oils in the water. It is suggested that a maintenance dose of 1 ounce per thousand gallons of water be added weekly. It is safe to swim immediately after adding this product to the water.
