## 4. Lift out of the pool

The robot will move to the pool's edge when it finishes cleaning. Use the provided hook to lift it out of the pool.

## 5. Clean after each use

①

②

③

④

Remove the filter basket located under the top cover. Spray it using your garden hose and a hose end spray nozzle to clean it thoroughly.

6. Charging the robot

● Charging
● Fully Charged

Make sure the charger and the charging port are clean and dry. Use only the original charger at all times.
