

Closing Instructions

First things first:

Do not winterize pool until water is properly balanced and is clear of all algae growth, dirt and leaves.

Doheny's® Water Test Strips are available to ensure pH and alkalinity levels are in balance.

Doheny's® Pool Vacuums and Auto Cleaners remove dirt and debris from the floor of your pool.

Doheny's® Leaf Skimmers remove floating leaves and debris from the surface of your pool.

1 Stop chlorination 24 hours prior to winterization.

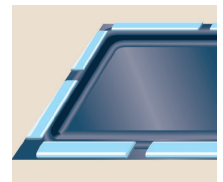

2 Pour entire bottle of **Natural Chemistry METALfree** into pool, making sure product is evenly distributed around entire pool.

5 If possible, allow pump to circulate for at least one hour to ensure that all chemicals disperse evenly.

6 Lower water level and drain lines, pump, filter, and heater of all water according to manufacturer's instructions. If you use pool anti-freeze, add it to your plumbing at this time.

8 Cover pool with a Winter Cover. **Doheny's®** offers top-quality Solid and Mesh type covers.

Note: If Spring is unusually warm, lift up one end of the cover and look for signs of algae growth. If detected, an additional dose of Doheny's® Algaecide should be added.

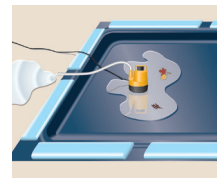

3 Pour entire bottle of **Natural Chemistry Pool Magic + PHOSfree** into pool, also making sure product is evenly distributed.

7 **Punch holes in ALL dimples located on both sides of the floating dispenser.** Slide foam collar onto dispenser as shown. Place floating dispenser in pool, smallest diameter down, which allows water to flow through perforated dimples. Do not throw in pool.

9 In Spring, remove water and debris from cover using a siphon or submersible pump available from **Doheny's®**. Then remove the cover, reconnect all plumbing, raise water, and discard winterizing floating dispenser.

4 Wait 15 minutes and then slowly broadcast all packages of **Doheny's® Chlorine Free Oxidizing Shock** around the perimeter of the pool.

10 Add **Doheny's® Pool Master Start-Up Kit**, following directions, to your pool. Start your swimming season with sparkling, clean water.
